

**Momentum towards telemedicine
deployment –
legal, regulatory and security issues**

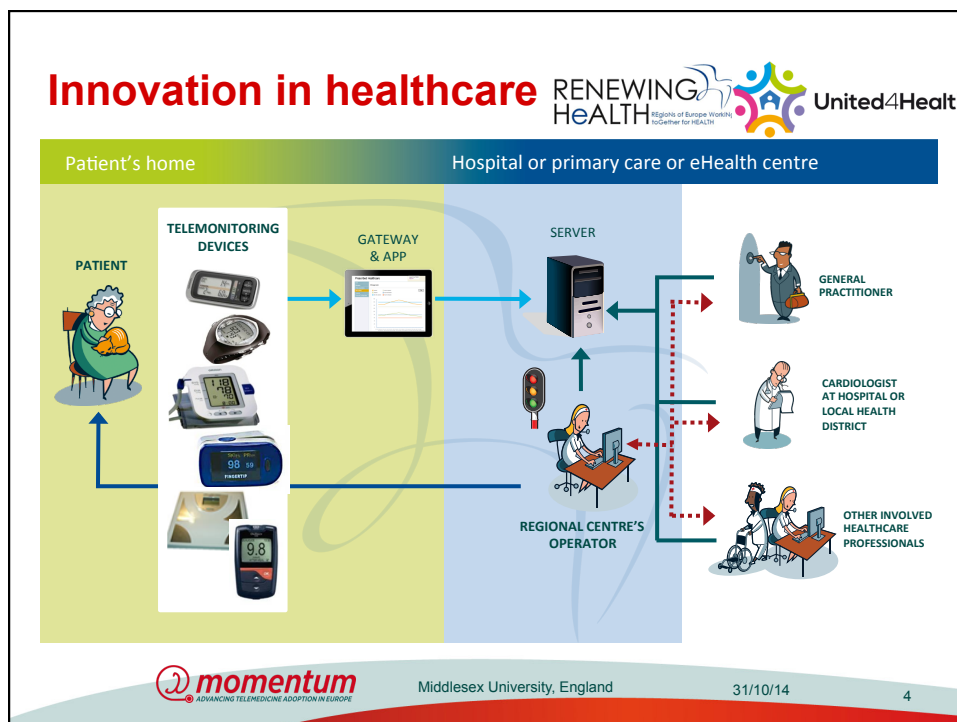

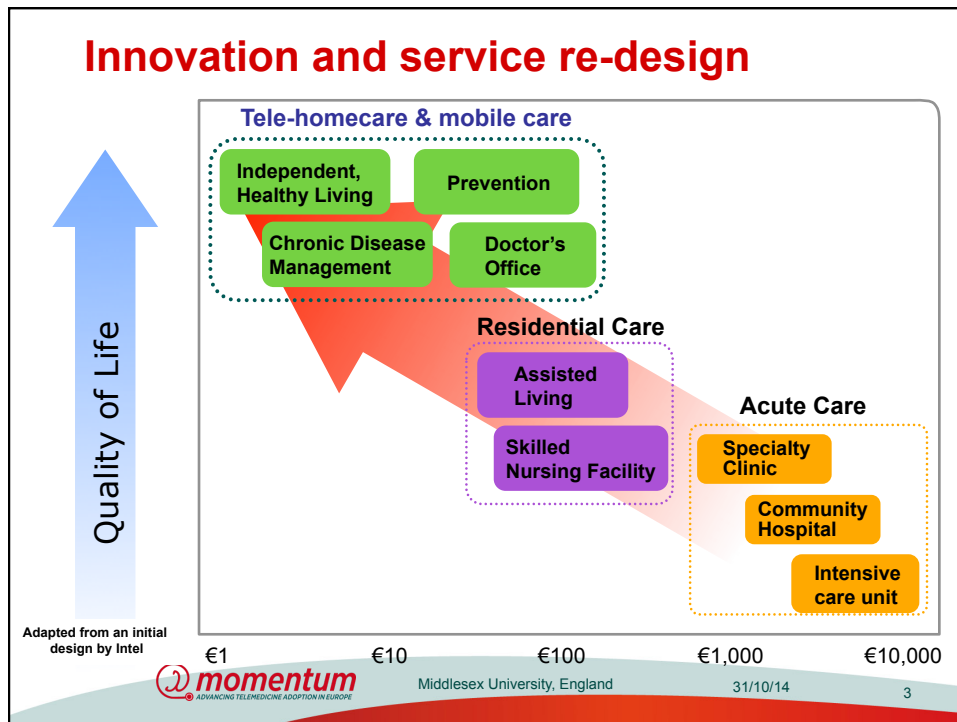

Diane WHITEHOUSE, EHTEL

Overview

- **European and general background.**
- **MOMENTUM, the thematic network.**
- **Pilotitis, scaling-up, from pilot to routine care: tools and methods are needed.**
- **MOMENTUM blueprint (i.e., guidelines).**
- **Critical Success Factors for Legal, Regulatory and Security Compliance.**

Digital Agenda
1001100101011101110000100 2010-2020
for Europe

eHealth actions in Digital Agenda for Europe

Key Action 13 Undertake pilot actions to equip Europeans with secure online access to their medical health data by 2015 and to achieve by 2020 widespread deployment of telemedicine services.

An EMPOWERING movement

31/10/14 Middlesex University, England 5

European Innovation Partnership on Active & Healthy Ageing

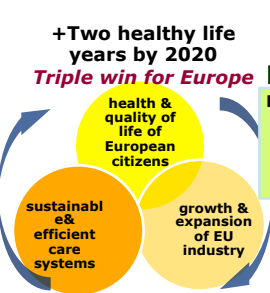

crosscutting, connecting and engaging **stakeholders** across sectors, from both private & public sectors

Specific Actions

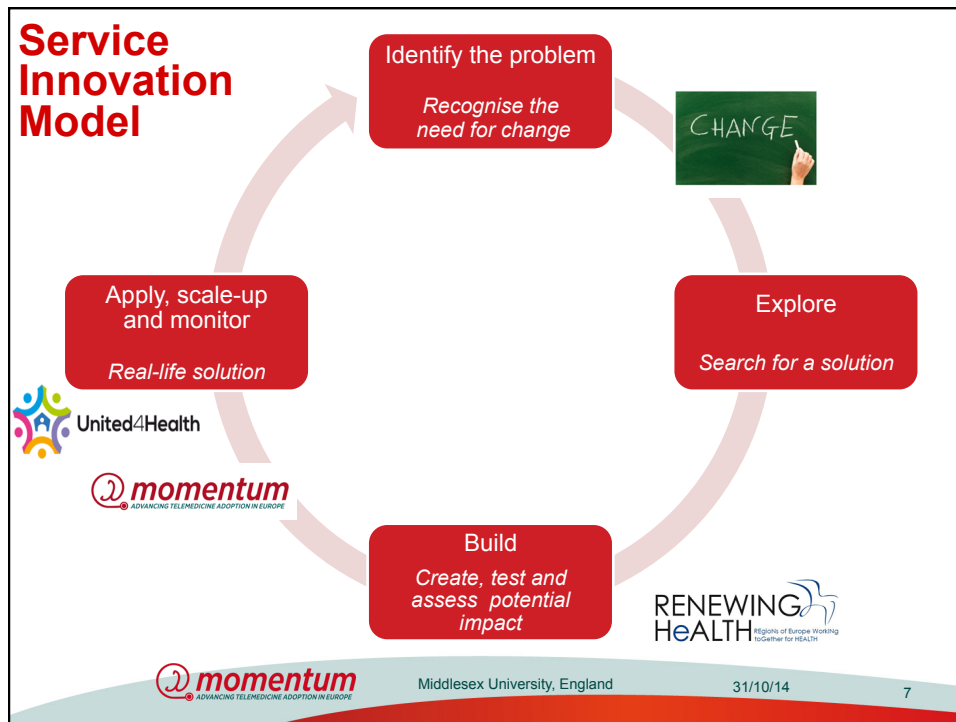

- Improving prescriptions and adherence to treatment
- Better management of health: preventing falls
- Preventing functional decline & frailty
- Integrated care for chronic conditions, incl. telehealth
- ICT solutions for independent living & active ageing
- Age-friendly cities and environments

+Two healthy life years by 2020
Triple win for Europe

Pillar I Prevention screening early diagnosis
Pillar II Care & cure
Pillar III Independent living & active ageing

31/10/14 Middlesex University, England 6

Momentum: the Project

- **A CIP ICT-PSP thematic network**
 - Running from February 2012 until December 2014
- **The consortium: 19 organisations**
 - Telemedicine associations and competence centres (“telemedicine doers”) from
 - Denmark, Estonia, France, Germany, Greece, Israel, Netherlands, Norway, Poland, Portugal, Spain, Sweden, Switzerland, United Kingdom
 - European stakeholder associations representing
 - Health professionals and health care organisations, health insurers, technology vendors

Scaling-up? From pilot to routine care ...

MIND THE GAP

 Middlesex University, England 31/10/14 9

Tools and methods are needed to deploy telehealth services

- **Impact assessment framework**
 - The results and lessons learned from Renewing Health
 - The approach of United4Health
- **Guidelines for large-scale deployment**
 - The Momentum blueprint
- **Cost and benefit analysis toolkit**
- **Innovation governance**

 Middlesex University, England 31/10/14 10

Four domains for deployment blueprint - guidelines

Enabling service deployment: 18 critical success factors

Critical Success Factors for Deployment Strategy

1. Ensure that there is **cultural readiness** for telemedicine.
2. Ensure **leadership** through a champion.
3. Come to a consensus on the advantages of telemedicine in meeting **compelling need(s)**.
4. Pull together the **resources** needed for deployment.

Critical Success Factors for Organisational Change

5. Address the needs of the **primary client(s)**.
6. Involve health care **professionals and decision-makers**.
7. Prepare and implement a **business plan**.
8. Prepare and implement a **change management plan**.
9. Put the **patient at the centre** of the service.

Critical Success Factors for Legal, Regulatory and Security Compliance

10. Assess the conditions under which the service is **legal**.
11. Identify and apply relevant legal and security **guidelines**.
12. Involve **legal and security** experts.
13. Ensure that telemedicine doers and users are **“privacy aware”**.

Assess the conditions under which the service is legal.

- Regarded by the authorities as an **appropriate** way to offer healthcare services?
- Under what circumstances is a telemedicine service regarded as **legal**? (cf. a **“legal risk assessment”**)?
- **Covered by law** (i.e., **not inhibited** by law or by bodies with competence in the telemedicine field)?
- **In accordance** with general **requirements** for best practice in medicine?

Identify and apply relevant legal and security guidelines.

- **Non-binding international codes of practice.**
- **Operational national guidelines related to application of relevant legislation and regulations.**
- **Codes of conduct (which also emerge from professional organisations).**

Examples from e.g., Australia, South Africa, United States of America; Denmark, Finland, Norway, CPME; TSA; TeleSCOPE.

Involve legal and security experts.

- **Identifying, exploring and applying current legislation and regulations.**
- **Undertaking “legal risk assessments”.**
- **Undertaking information security risk assessments.**
- **Aiming for “privacy by design”.**

Ensure that telemedicine doers and users are “privacy aware”.

- Privacy awareness training is part of a privacy aware **organisational culture**.
- Privacy awareness training should be given to a **wide range of end-users**.
- Patients should be made “privacy aware” in any accompanying **patient consent** information.
- Privacy awareness training/education to health personnel (i.e. telemedicine doers) to include the **legal requirements surrounding how to obtain patient consent properly**.

Critical Success Factors from an ICT perspective

14. Ensure that the appropriate IT and eHealth **infrastructures** needed are in place.
15. Ensure that the technology is **user-friendly**.
16. Put in place the technology and processes required to **monitor** the service.
17. Maintain **good procurement** practices
18. Guarantee that the technology has the **potential for scale-up**.

The challenge for scaling-up innovative services in healthcare

- **It is about moving**
 - From building tools and infrastructure to developing service, redesigning care pathways.
 - From collecting data to integrating data into care processes.
- **New Technology + Old System = New Old System**
